SpendVue™
Turning Data Into Opportunity

Actionable in-depth intelligence for your organization's spending.

Does your organization have in-depth intelligence on its spending the same way it does for its customer base or brand?

SpendVue™ is a new data visualization tool developed by ERA Group to provide topline executives with in-depth intelligence on their organization's spending.

Our certified analysts will drill deep into your financial data, applying our proprietary industry benchmarks to your spend. The result? Clear, immediate, and actionable insights available in an accessible and engaging format. Our certified advisors will work with you to identify a pathway to cash flow improvement that best suits your organization's needs.

A SpendVue opportunity analysis provides actionable insight into your organization's spend by uncovering:

- What was bought?
- How much was bought?
- Who is buying?
- How much was paid?
- Who was it bought from?
- What was delivered?

How it Works

- Provide your financial data to your ERA Group Consultant.
- Our team will cleanse and aggregate the data, classify into different levels of granularity and align it to industry benchmarks.
- We'll craft a custom dashboard visualization experience and schedule time with you to take you through "big picture" insights, drilling down to the details that matter to you most.
- You will be presented with scalable options to improve your cash flow based on ease of effort and potential opportunities.

Our Commitment

For over 30 years, we have helped clients unlock additional cash flow by forming relationships built on transparency and trust. We deliver Value Through Insight™by levering industry knowledge to maximize savings without compromising quality or service levels. Our remuneration is solely based on the cost savings achieved for your company.

Let's Get Started
